

30 AND 50 AMP GENERATOR POWER BOXES

Generator power boxes allow you to keep the generator outside and bring the power inside, preventing dangerous carbon monoxide fumes from entering your home.

FEATURES:

- 120/240VAC
- NEMA type 3R rated enclosure
- Accepts Siemens HR series conduit hubs
- 1/2 & 3/4 knockouts
- Spring loaded cover closes when not in use
- 4.25" x 4.25" x 6.75"

WHEN THE POWER GOES OUT:

1. Connect portable generator to RPP Generator Power Box.
2. Ensure connections are proper and transfer power to electrical panel per the wiring instructions.
3. Enjoy the convenience and safety of using your portable generator without running extension cords.
